- A Member's Perspective: *When I was assigned the responsibility of safety in our office and plant, I had no idea what was needed or required. The AWI Safety Solutions CD-ROM came to my rescue! From that one resource I was able to produce our written safety program, learn OSHA requirements for various areas, provide shop safety talks for our plant foreman, provide maintenance and safety checklists for our ongoing safety program, and print out forms for all the reports we need. We now have a great safety program in place. We have seen it pay in reduced reportable incidents as well as an increased safety-mindedness among our employees, and we know that we are keeping our plant compliant with OSHA's standards. What a great resource!*
– Teresa Bell, Kentucky Mill and Casework and member, AWI Insurance and Safety/Loss Control Committee
